

Abdullah Gull

Aspiring AI & IoT Engineer

(+92) 3061005084 | gull66332@gmail.com | github.com/gulljee

ABOUT ME

Enthusiastic Computer Science graduate with a strong interest in learning and exploring the fields of Artificial Intelligence (AI) and the Internet of Things (IoT). Leverages a solid programming foundation in Java, Python, and C++ to grasp microcontrollers, basic sensor interfacing, and fundamental machine learning concepts. A fast learner and collaborative problem-solver looking to secure an entry-level role where I can apply my academic knowledge and build practical experience in smart systems.

EDUCATION

University of the Punjab (PUCIT) <i>BSCS CGPA: 3.01</i>	Lahore, Pakistan <i>2022 – 2026</i>
Punjab Group of Colleges <i>FSc 98%</i>	Sargodha, Pakistan <i>2019 – 2021</i>

PROJECTS

Sensor Monitoring Experiment (ESP32 & IoT basics)

- Developed a basic IoT prototyping project utilizing an ESP32 microcontroller to read data from temperature and humidity sensors.
- Programmed the microcontroller using the Arduino IDE to print sensor readings to the serial monitor and handle basic logic thresholds.
- Explored wireless communication basics by setting up local Wi-Fi connections to transmit simple data strings.

Image Classification Practice (Python & OpenCV)

- Built a hands-on learning project using Python and OpenCV to understand the fundamentals of computer vision and image manipulation.
- Experimented with pre-trained object detection models to identify basic shapes and colors within image files.
- Wrote simple scripts to load, crop, resize, and apply filters to digital image assets.

MentorWise (MERN) | Github

- Developed a full-stack multi-role platform to connect junior students with senior mentors, helping them secure better grades and handle academic challenges.
- Built a 'Digital Classroom' with real-time direct messaging, task assignments, timed tests, and global shared drive.
- Integrated a Gemini AI consultant, mentor session booking, and feedback transcripts to effectively track and manage student performance.
- Implemented strong security using Google OAuth, encrypted passwords, and JWT to keep user data safe.

Hostello (Java) | Github | Live preview

- Engineered a multi-role hostel management system using Java Servlets, JSP, and PostgreSQL, streamlining daily operations for both residents and admin.
- Integrated a student portal featuring room availability tracking, peer reviews, an automated complaint registry, and a digital mess attendance tracker
- Developed an admin dashboard that optimized room allocation, automated student application workflows, and simplified mess management.
- Architected the backend utilizing MVC architecture and DAO design patterns to ensure high code modularity, seamless database operations, and scalable data access.

EXPERIENCE

Shams AI Sahil <i>Sales Assistant</i> • Drove business growth through lead generation and effective sales strategies. • Managed dubizzle accounts to increase online presence.	2024 – 2025 <i>Remote</i>
Freelance <i>Content Writer</i> • Authored tech blog posts and implemented SEO to improve website rankings. • Developed high-converting affiliate content to generate leads and drive affiliate revenue.	2021 – 2022 <i>Remote</i>

TECHNICAL SKILLS

AI IoT Foundations: Basic Machine Learning, Computer Vision Concepts, Microcontroller Basics, Sensor Reading.
Hardware Protocols: ESP32, Arduino IDE, Wi-Fi/HTTP Basics.
Languages & Databases: Python, C++, Java, JavaScript, SQL (PostgreSQL, MySQL).
Developer Tools: Git, GitHub, Linux Command Line, VS Code, OpenCV.
